Matt,

The "mark as read" for posts don't seems to work. Every time I connect me on the forum all new posts are "marked as unread" one week even if I read them...

Cheers,

Vincent.

Vincent,

I'll look into it. It seems to be a cookie wierdness. I can mark all posts as read on one machine, but then when I log in from another, they're not marked as read anymore.

Thanks for reminding me!

Matt

Thanks Matt.

Take care...

Vincent,

It appears that there is an update I can apply for the forums. Of course, I am not positive that the issue will be addressed, but I'll give it a shot. And, of course, upgrading these components is never a fun task... :) I'll try to tackle it this weekend, if I can.

Take care,

Matt Reinfeldt
